Replit proof of use status

Evidence status: review draft; unresolved fields are not certified.

Status: NOT YET EVIDENCED

This is a preparation record, not valid proof of use. No Replit account, project history, credit consumption or deployment was accessed in the observed workflow. A ChatGPT Sites URL is not Replit proof. Do not submit this page as a completed usage claim.

Team fields

Team: Rising Rookies. Project: PathFinder. Leader: LIN ZIRUI. University: Xiamen University Malaysia. Members: 5. Domain: 1. Primary SDG: 4.

Evidence to insert after actual use

Team-owned Replit project URL: PENDING. Account/project owner: PENDING. Activity date and what the team did: PENDING. One of live Replit deployment, accessible project history, or finished-credit proof from the team’s own account: PENDING. Attach a genuine screenshot showing project identity and activity, with secrets and unrelated personal information removed.

Prepared implementation

The source bundle includes .replit and src/main.py. The run command is python3 src/main.py. It serves dist/ on 0.0.0.0 using PORT (default 3000). Import/run the source in the team’s Replit account, verify the UI, preserve actual history, then replace this status page with genuine proof. Replit compulsory rule: orientation PDF p.29; sample repository submission folder includes a Replit_POU PDF.

Completion gate

Actual team use is mandatory. Configuration files, a planned deployment or a fabricated screenshot do not meet that requirement. Add the Replit service and actual plan/region to Technical Tools Declaration sections 3.2 and 5, and update the proposal architecture and README.
